

Women In Logistics

AlReem Bin Ali

“My name is AlReem Bin Ali, I am a mechanical engineer and I am currently a trainee supervisor in the engineering department at DP World.

I joined the DP World team in 2021 through the Ruwad Training Programme. The training program enabled us to gain comprehensive knowledge around the workshop, especially in the field of mechanical engineering. Through the program we learn about various types of equipment, including container cranes, terminal trucks and other heavy and light equipment such as cars, to carry out maintenance and repair work.

Ruwad Training Programme aims to train future leaders through various workshops, allowing us to acquire the skills we need to support us in administrative roles in the future.

Additionally, my recent nomination to the role of Vice President of Ruwad Council enables me to deal directly with all trainees from various departments, as well as the Personnel Management Department and the Emiratization Department

At DP World, many women are pioneers in various challenging fields. The company's support for their involvement in such roles is what has shaped the role of women in today's work environment. The most beautiful thing about DP World is the encouraging work environment.”
